

## Manuscripts Accepted for Publication

At the time this issue went to press, the following manuscripts have been received in their final forms and accepted for publication in NDPLS, beginning in October, 2007.

Basener, B., Brooks, B., Radin, M., & Wiandt, T. Dynamics of a discrete population model for extinction and sustainability in ancient civilizations.

Draves, S. Art feature for 2008: Electric sheep.

Gligor, L., & Gligor, M. The fractal city theory revisited: New empirical evidence from the distribution of Romanian cities and towns.

Jacobsen, J. J., & Guastello, S. J. Nonlinear models for the adoption and diffusion of innovations for industrial energy conservation.

Kosinski, R. A., & Grabowski, A. Nonlinear model of epidemic spreading in a complex social network.

Kreindler, D. M., & Lumsden, C. J. The effects of irregular sampling and missing data on largest Lyapunov exponent calculations.

Navarro, J., Arrieta, C., & Ballarín, C. An approach to the study of the dynamics of work motivation using the diary method.

Nicolis, H. Nonlinear dynamics and probabilistic behavior of adolescent suicidal outbreaks.

Nicolov, S., Yankulova, E., Wolkenhauer, O., & Petrov, V. Principal difference between stability and structural stability (robustness) used in systems biology.

Sambrook, R. C. Spatial behavior analysis at the global level using fractal geometry.
