

Correction

It has come to our attention that the following corrections should have been made to the article:

Katerndahl, D., & Wang, C.-P. (2007). Dynamic covariation of symptoms of anxiety and depression among newly-diagnosed patients with major depressive episode, panic disorder, and controls. *NDPLS, 11*, 349-365.

P. 356, Table 1: The captions for the third and fourth columns should read: Subjects with MDE and Subjects with PD, respectively.

P. 357, Table 2: The captions for the fifth and sixth columns should have been additionally labeled: Anxiety and Depression, respectively.

P. 361. Table 6 should read as follows:

Table 6. Intergroup Attractor-level Comparisons.

<i>Indicator</i>	<i>Controls</i>	<i>Depression</i>	<i>Panic</i>	<i>Kruskal-Wallis χ^2</i>
Size (Mean cells)	2.6	2.0	1.8	9.82**
Proportional				
Duration (%)	50	36	23	14.72***
Influence (%)	18	9	9	1.58
Stability (Mean hours)	1.04	2.45	2.03	7.29*
Week 1 Attractor				
Consistency				
(Mean weeks)	1.83	0.38	0.90	6.23*

* $p < .05$ ** $p < .01$ *** $p < .001$

Ad Hoc Reviewers for 2006

The *NDPLS* Editorial Board sincerely thanks the following people for their reviews of manuscripts received in 2006:

Felipe Amunategui
Clifford T. Brown
Chris Button
Carlos Comperatore
Linda Dennard
Glenda Eoyang
Peter Erdi
Terrill Frantz
Paul Frewen
Robert Galatzer-Levy
Larry Liebovitch
Albert Gilgen
Eystein Glatte
Tim Haslett
George Howe
Ljubisa Kocic
Gus Koehler
Giovanna Morgavi
Richard J. Neufeld
Karl Newell
Timothy Perper
David Pincus
Kurt A. Richardson
Mark L. Rieke
David Schuldberg
Janos Toth
Colin Wastell

Color Figures Available for 2007

The following articles have color figures that are available from the *NDPLS* web site (<http://www.societyforchaostheory.org/ndpls/>) as free downloads. Select “View Abstracts and Articles” from the menu, then Vol. 11.

Zausner, T. (2007). Process and meaning: Nonlinear dynamics and psychology in visual art. *NDPLS*, 11, 149-165.

Erjaee, G. H. (2007). Bifurcation analysis of predator-prey systems with constant rate harvesting using non-standard discretization. *NDPLS*, 11, 333-348.

Forthcoming Special Issue:

The *NDPLS* Editorial Board is pleased to announce a special issue on the topic of *Dynamics of Civilizations*, which is scheduled for January, 2008. The special issue self-organized as a result of several papers that reached the editorial office and passed the review process successfully during the first half of the year. We then posted a call for more papers on an admittedly short time horizon that expressed our willingness to include topics such as: human population growth and migration patterns, fractal organization and growth of settlement patterns, attitude or other cultural transmissions across human generations, changes in institutional structures, networks, relationships, individual phenomena that have widespread emergent potential, contemporary and ancient civilizations, and spatial economics.

The response to the call was vibrant. As for the listing of final selections, we will have to keep our readers in suspense until January.
