

Manuscripts Accepted for Publication

Aiello, G. L. Cognitive aspects of chaos in random networks.

Basener, W., Brooks, B., Radin, M., & Wiandt, T. Spatial effects and Turing instabilities in the invasive species model.

C<novas, J. S. Is the destabilization of the Cournot equilibrium a good business strategy in Cournot-Puu duopoly?

Dimitriadis, S. I., Laskaris, N. A., Tsirka, V., Vourkas, M., & Micheloyannis, S. An EEG study of brain connectivity dynamics at the resting state.

Gregson, R. A. M. Multistable switching series in chaotic nets.

Guastello, S. J., Peressini, A. F., & Bond, R. W. Jr. Orbital decomposition for ill-behaved event sequences: Transients and superordinate structure.

Greissmair, M., Strunk, G., Vetschera, R., & Koeszegi, S. Complexity in electronic negotiation support systems.

Martin, G. Network analysis and connectopathies: A review of current research and future approaches.

Peltzer-Karpf, A. The dynamic matching of neural and cognitive growth cycles.

Sprott, J. C. Chaos in Easter Island ecology.

Sulis, W. H. Causal tapestries for psychology and physics.
