

Manuscripts Accepted for Publication

The following articles have been accepted for publication in *NDPLS* in their final forms and will be appearing in the soonest possible issues.

Balle, M., Morillas, A., Tortella-Feliu, M., & Bornas, X. Heart rate complexity and attentional orienting: A new look as the role of vagal tone.

Castillo, R. D. Kloos, H., Holden, J. G., & Richardson, M. J. Fractal coordination in adults' attention to hierarchical visual patterns.

Frank, T. D. On the interplay between order parameter dynamics and system parameter dynamics in human perceptual-cognitive-behavioral systems.

Gomes, O. A model of animal spirits via sentiment spreading.

Guastello, S. J., Reiter, K., & Malon, M. Estimating appropriate lag length for synchronizaed physiological time series: The electrodermal response.

Guastello, S. J., Reiter, K., Malon, M., Timm, P., Shircel, A., & Shaline, J. Catastrophe models for cognitive workload and fatigue in N-back tasks.

Katerndahl, D. A., Burge, S. K., Ferror, R. L., Wood, R., & Becho, J. Modeling outcomes of partner violence using cusp catastrophe modeling.

Kiefer, A. W., & Myer, G. D. Training the antifragile athlete: A preliminary analysis of neuromuscular training effects on muscle activation dynamics.

Rosser, J. B., Jr., & Rosser, M. V. Complexity and behavioral economics.
